

What's in a Name? Burning Tractor is a collaboration between Austin and Wes Meyers, brothers who grew up on a horse farm in Northeast Texas. The name "Burning Tractor" represents the tireless work ethic and multi-faceted skills needed to function on a farm, pushed into the digital age and applied to audio and video production. There were many times back on the farm where they didn't have what they needed to get a job done, but instead of going out and purchasing something, they would make their own, or find another way to get it done with the resources available to them.

In today's digital age, a pair of Pro Macs give us the resources to create extremely professional and creative products at a fraction of the cost of production companies with larger infrastructures.

Burning Tractor offers a wide variety of services that range from audio and video production, recording, conception, writing, as well as graphic design, web design and even welding and construction, and if you ask nicely enough we might even cook you breakfast.

We work in High Definition, and routinely shoot with 35mm adapter rigs on pro level HD cameras, and well as shoot direct-to-disk for FX's work and projects where quality is of the utmost importance. We have experience shooting Live performances, Green Screen FX's, Commercials, and even Outdoors/Nature footage.

#### Video/Graphics

- Conception & Creation
- Pre-production
- Shooting & On-set Production
- Post Production
- Mastering & Delivery
- Motion Graphics

#### Audio Production

- Recording
- Tracking/Mixing
- Mastering
- CD Authoring
- Writing/Composing
- Studio Musician
  - Drums • Percussion • Bass •
  - Guitar • Keyboard •

We use Logic Studio 8 for the latest and greatest in DAW connectivity and quality. We use digital interfaces by M.O.T.U. and have a full studio, including overnight accommodations, for recording here in Austin. We even have the capability of throwing half the studio in the bag and going on location depending on the nature of the project.

In addition to Video & Audio production, we can also create graphics and web media to give you a fully turnkey experience.

We are even expanding into programming database driven web apps for creating dynamic or user generated content. Shoot us and email and tell us what we can do for YOU!

#### Web/Graphics

- Basic Websites
- PHP & MySQL Based Applications
- Photography
- Fliers & Labels

Austin graduated from The University of Texas in 2005 with a degree in Radio-Television-Film. He has since worked for numerous production companies, as well as freelanced for individuals, companies, and government agencies. Austin is a digital handyman, being well versed in many, many aspects of production. From pre-production to final mastering and delivery, Austin has probably had his hands on it in one way or another. Austin's experience doesn't stop with production either, he is also a welder, decorated Equestrian, outdoorsman, and part time inventor.

Wes is currently enrolled in the University of Texas, and will be graduating this spring. He is an accomplished musician turned producer. Wes' musical aspirations started in middle school when he joined the school's band and took up percussion. From the very beginning Wes has been first chair in every band he played in, and is extremely proficient in a wide array of instruments including: drums, marimba, guitar, bass, timpani, keyboard, and virtually anything that he can get noise to come out of. Wes has been creating his own music since he was a young teenager, and he and his brother even constructed their own studio out of part of a barn on the farm they grew up on.

Shannon and Austin first met 4 years ago when working on some productions together. Since then they have collaborated extensively and are good friends. Shannon has a creative eye that few possess and the skills to visually recreate what he envisions in his head. Shannon's latest foray is into shooting HD through a letus35 35mm lens adapter and the stuff he is cranking out is absolutely stunning. Shannon has done work for CitySearch, and various commercial and Indie projects across the country. Shannon's acute eye and skilled creative and shooting styles make him a welcome addition to the Burning Tractor Crew.
